

innoPEX

CRYUMS

ELECTROMAGNETIC + FREEZING

1 MACHINE WITH DOUBLE EFFECT

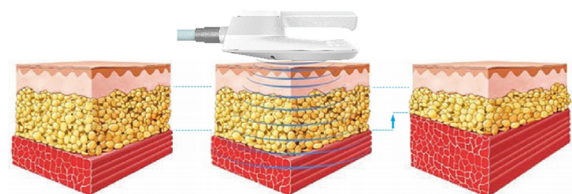

The new combination for muscle increase and fat reduction

Build muscle and reduce fat in 30 minutes, faster and more effective

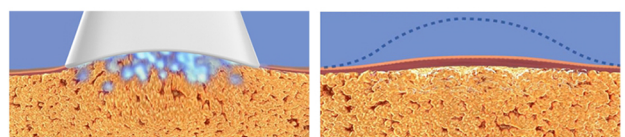

COMBINING TWO TECHNOLOGIES

The combination of cryo-lipolysis and high-focus electromagnetic technology can freeze fat cells at low temperature and reduce the thickness of the fat layer. At the same time, the high-energy electromagnetic energy acts on the core muscle group for a second time, stimulates the growth of muscle fibers, consumes excess fat, and achieves sustainable muscular body shaping.

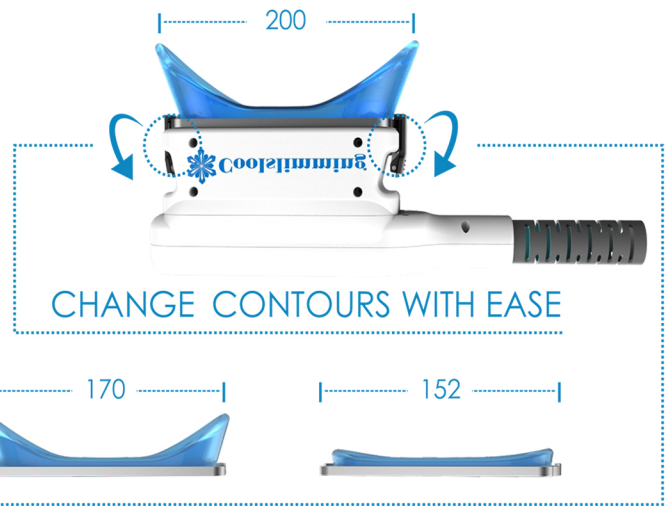

**ELECTROMAGNETIC
+
FREEZING**

COOLING 360° FAT FREEZING

Taking advantage of the fact that subcutaneous fat cells will automatically coagulate when the temperature is lower than 0 degrees, the temperature of 0 ° C to -11 ° C is delivered to subcutaneous fat, so that fat cells undergo a series of cellular reactions to increase the production of intracellular free radicals and induce fat cells to dissolve Metabolized, naturally excreted from the body.

- 360° Surround Cooling Handpiece
- Innovative "Preheat" Patent
- Exclusive massage mode
- Safety temperature sensor monitoring technology
- Intelligent positioning scans the fat layer
- One-button automatic cleaning handpiece is convenient and hygienic

• Flat applicator

• Curve applicator

MOVING HIGHLY FOCUSED ELECTROMAGNETIC BUILD MUSCLE

• It's for arms, abdomen, pelvic floor and buttock.

High-energy focused electromagnetic waves stimulate muscles to perform high-intensity and high-frequency contractions, start myofibril repair to achieve the effect of muscle growth, increase body muscle tissue and increase basal metabolism; high-energy focused electromagnetic fields are used for high-frequency and high-intensity muscle training. Fast consumption of fat, so that the fat volume is reduced, dissolved and metabolized out of the body.

- A variety of operation modes, which can gradually strengthen the muscles to achieve the perfect exercise effect
- More intensive muscle contractions with a 20% increase in energy
- High magnetic energy, more effective on core muscles
- Stimulate deep core muscles in 30 minutes for stronger contractions

Why choose us ?

The first in the industry: dual-energy working system (refrigeration technology + high-focus electromagnetic technology)

Powerful energy: dual power supply configuration, independent energy output is stable, no attenuation.

Various sizes of handpieces: **2 kinds of hand tools, 5 kinds of sizes are suitable for many parts of the body.**

2 cooling handpieces, each with three different sized handpiece heads;

2 electromagnetic handpieces, flat or curved optional; Multiple parts can be improved at one time, and one or more (freezing + electromagnetic) can be used in combination

Intelligent operation platform, two independent operating systems, four handpieces work at the same time, easy to learn

Advanced monitoring system, real-time monitoring of temperature and data changes

The freezer handpiece is equipped with one-button intelligent cleaning function, which is safe and hygienic

Therapeutic advantage

Patented technology, high strength, high focus.

Double effect, fat-dissolving & muscle-building in one step.

Non-invasive, safe and comfortable without recovery period.

Multiple parts work at one time, saving time and convenience.

After treatment, the effect of muscle increase continued to **19%**.
